\* From website, click on Downloads

\* Existing & Past ECM Users, updates here as well

Developed in 1997 by a licensed professional engineer with one goal in mind: **MAKE NEC CODE CALCULATIONS SIMPLE!**

This code calculation software tool was designed for use by contractors, estimators, engineers and maintenance personnel throughout the electrical industry. It improves productivity by making NEC Code calculations fast, accurate and easy.

Includes all of the features you need. We are continually upgrading the program to include additional features and to maintain compatibility with the newest editions of the NEC as they are published.
